Natural Oak CDE

Simply  
oak.

Bare oak tree with spooky branches,  
Huge moon, Blue Sky

A photograph of a forest of European Oak trees. The scene is bathed in the warm, golden light of early morning. Sunlight filters through the dense canopy of green leaves, creating a dappled pattern of light and shadow on the forest floor. Several large, mature oak trunks are visible, their bark textured and weathered. The ground is covered in tall, green grass. The overall atmosphere is peaceful and serene.

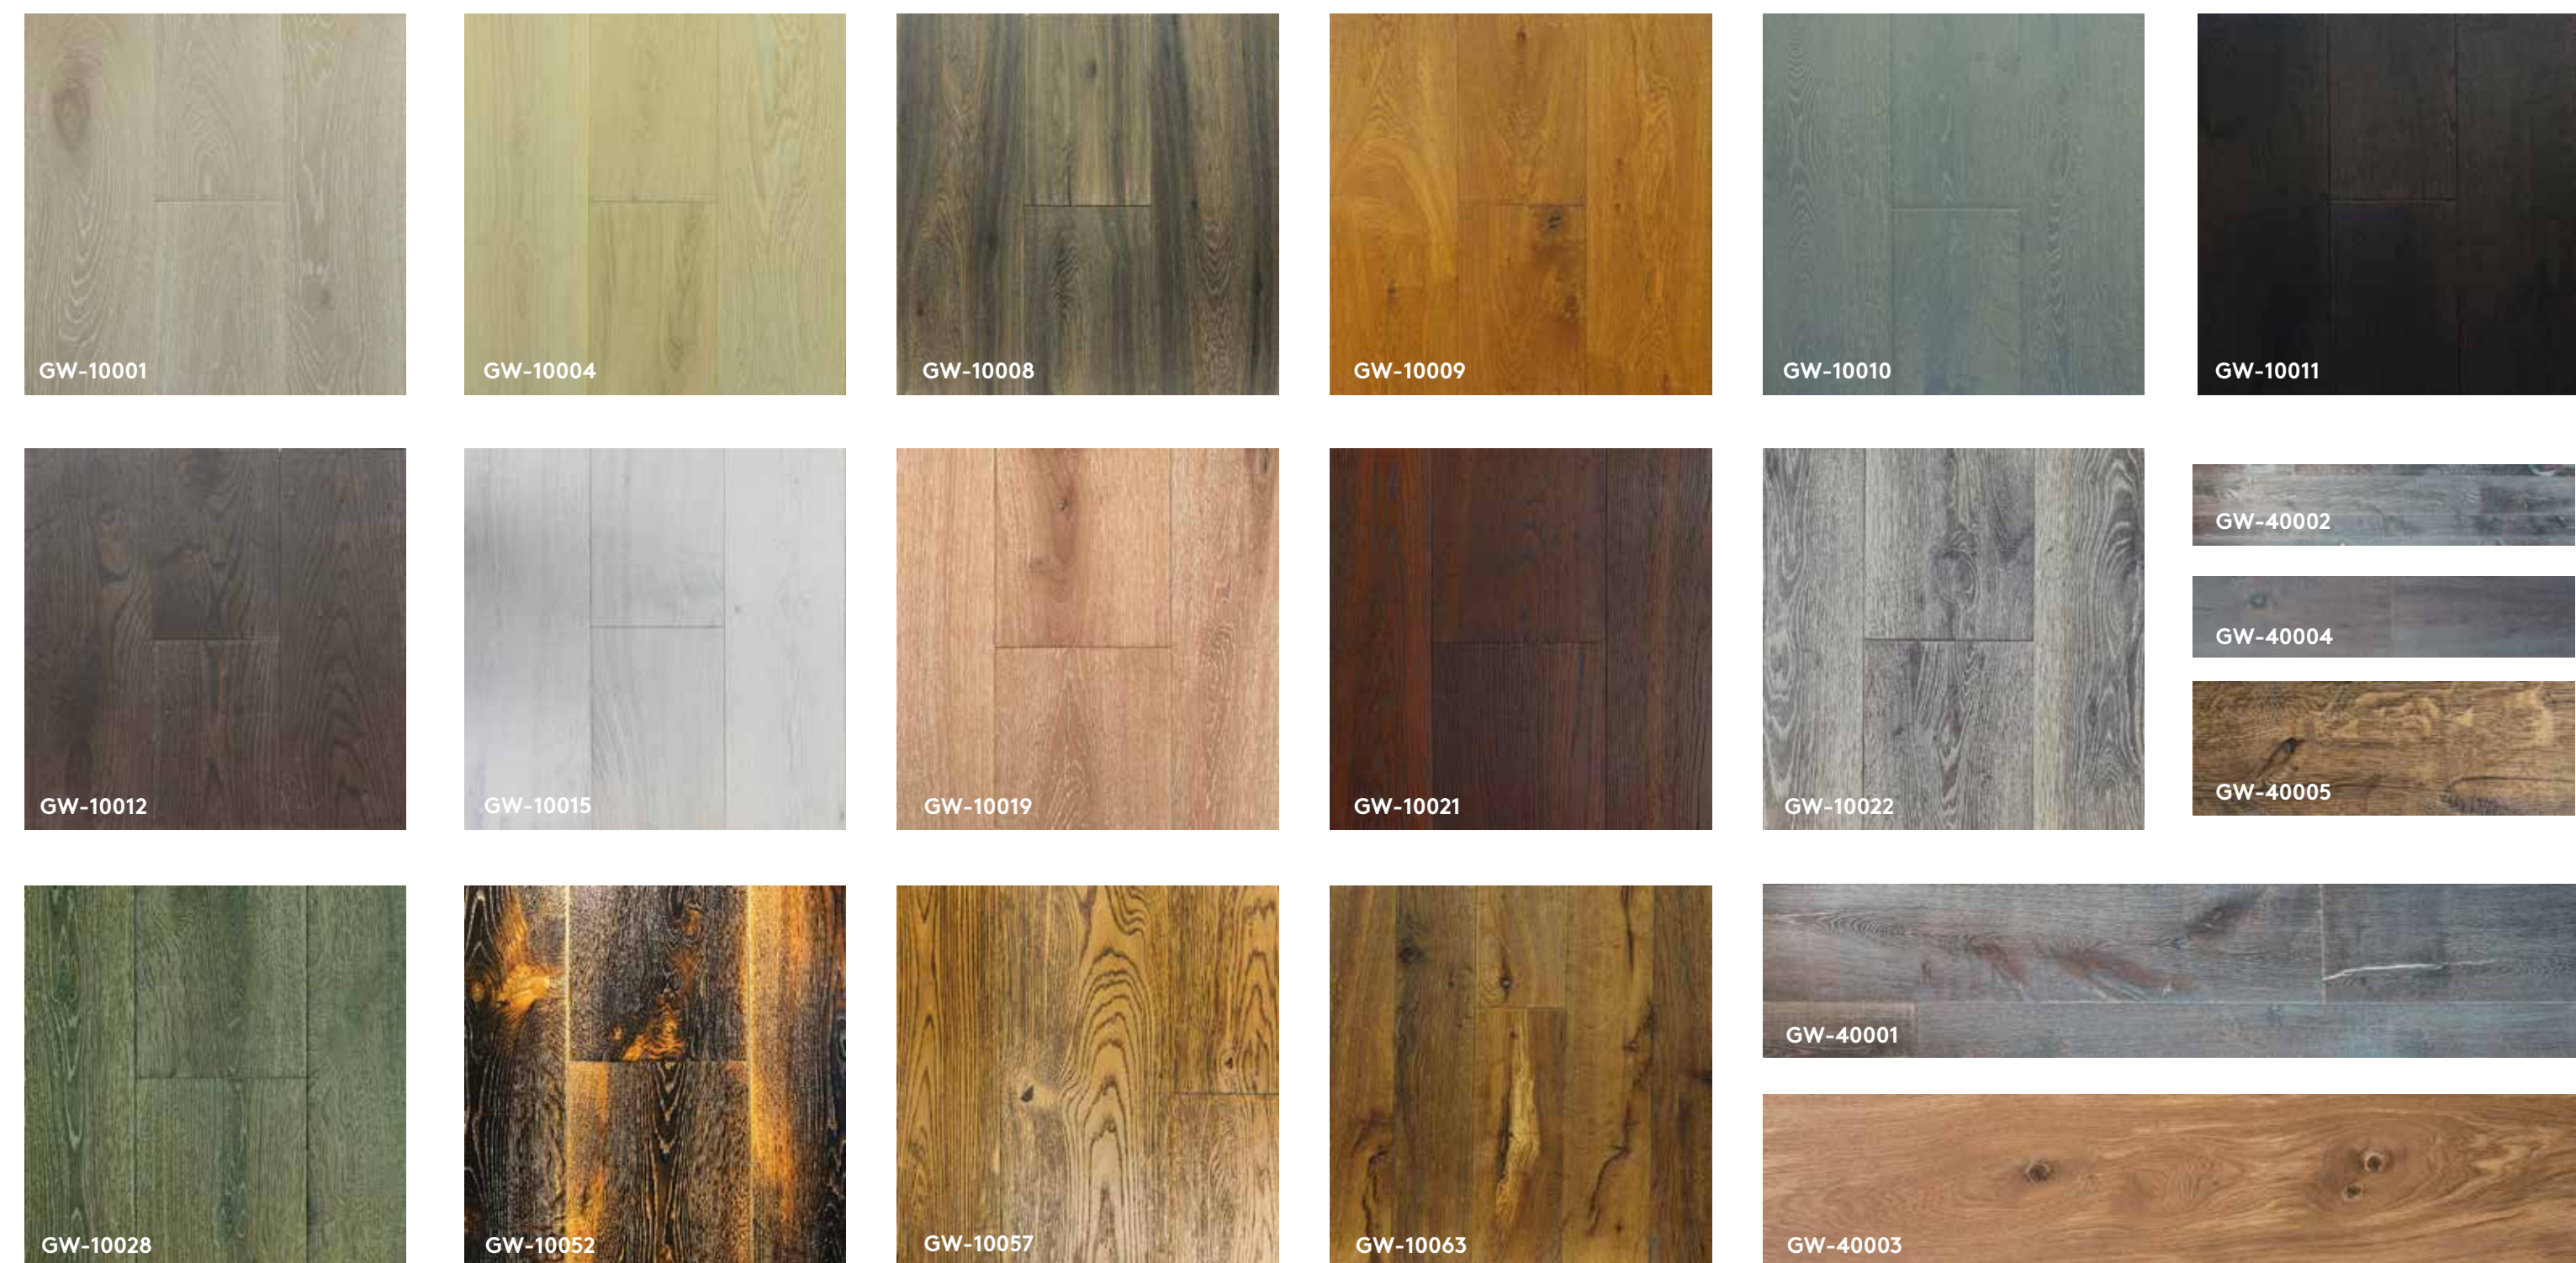

# European Oak

Early morning sun in forest on  
old oak trees, Bavaria, Germany.

# European OAK WOOD

Made with uncompromising quality, we manufacture parquet engineered flooring that meet the highest quality standards for public and residential use. The smooth European Oak floors are offered in subtle, light colors that bring a clean, modern, vibrant look to any space, finished off with a durable ultra-matte urethane finish.

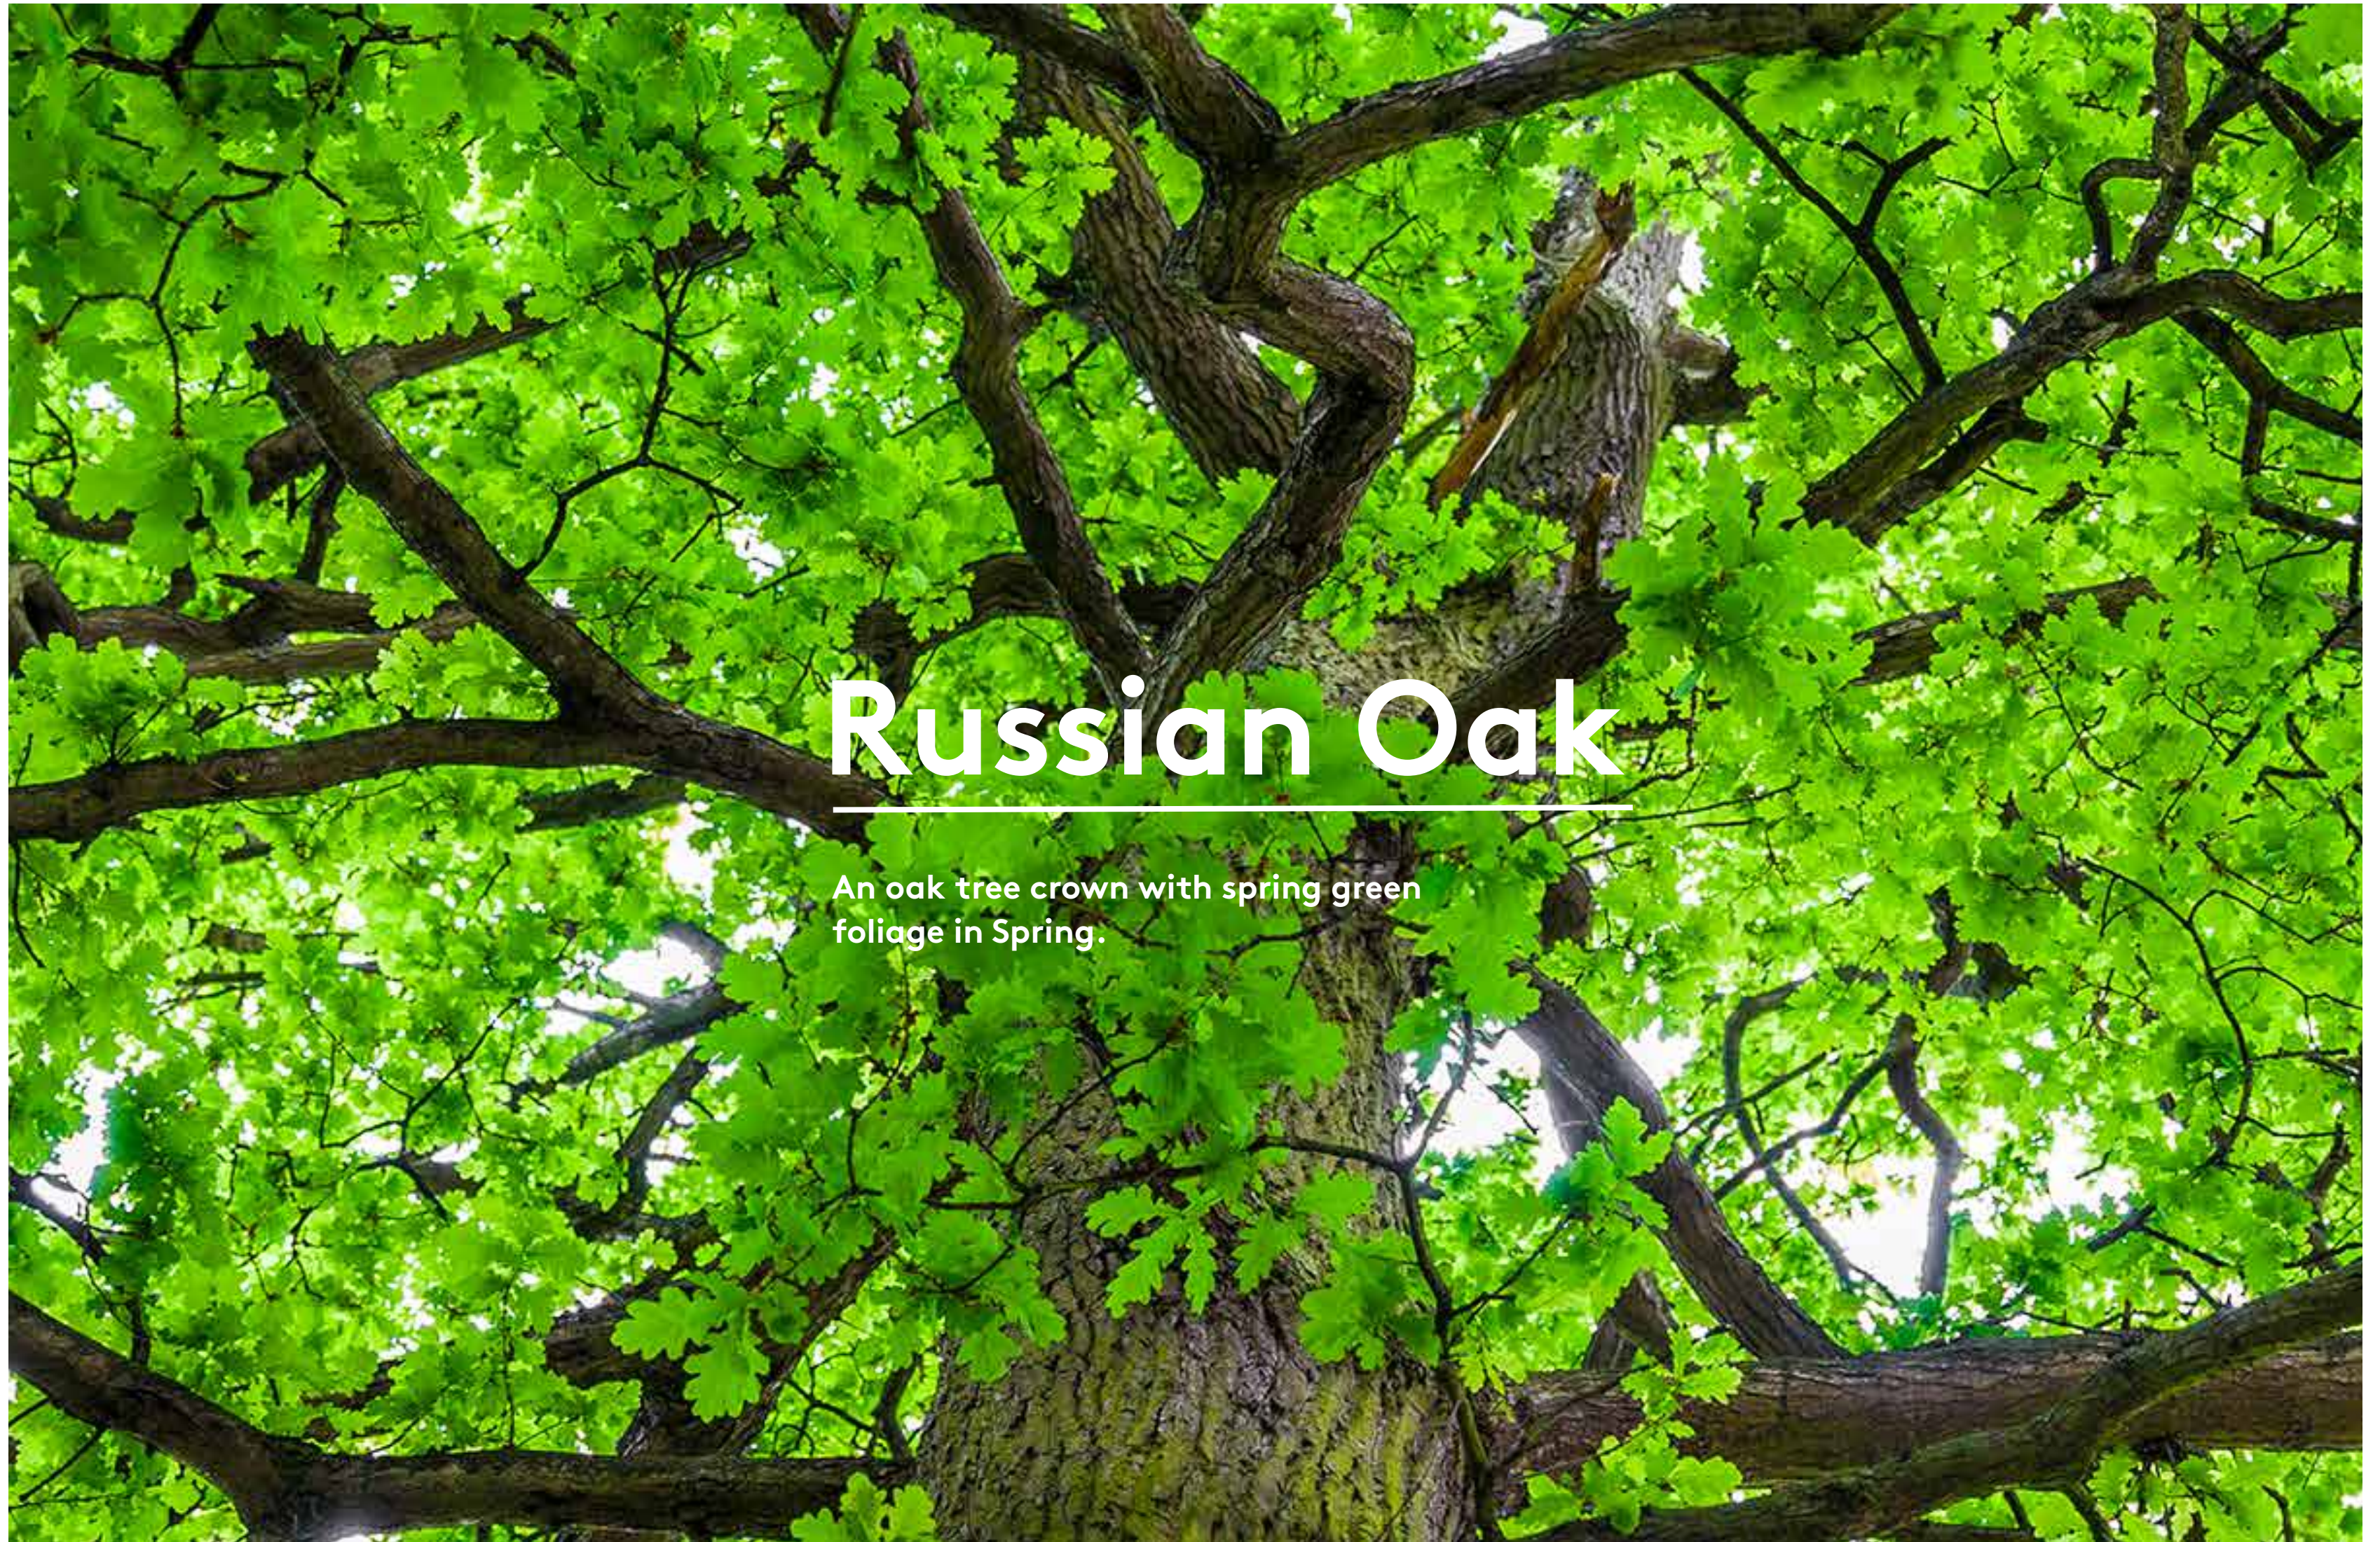

Grade **A** **B** **C** **D** **E**

# Russian Oak

---

An oak tree crown with spring green foliage in Spring.

Russian  
**OAK** WOOD

Russian oak is delicate and not easily deformed, making it an ideal options for making wooden floors. Russian white oak is not too expensive in the case of extremely high quality. It is a high quality material with good quality and low price, which is more suitable for ordinary consumers.

Grade **A** **B** **C** **D** **E**

Russian oak showroom.

A low-angle photograph of a black walnut tree in autumn. The tree's trunk and branches are covered in thick, white, peeling bark. The leaves are mostly yellow and orange, with some green still visible. The background is a clear blue sky.

# American Walnut

A black walnut tree with yellow leaves in Autumn, United States.

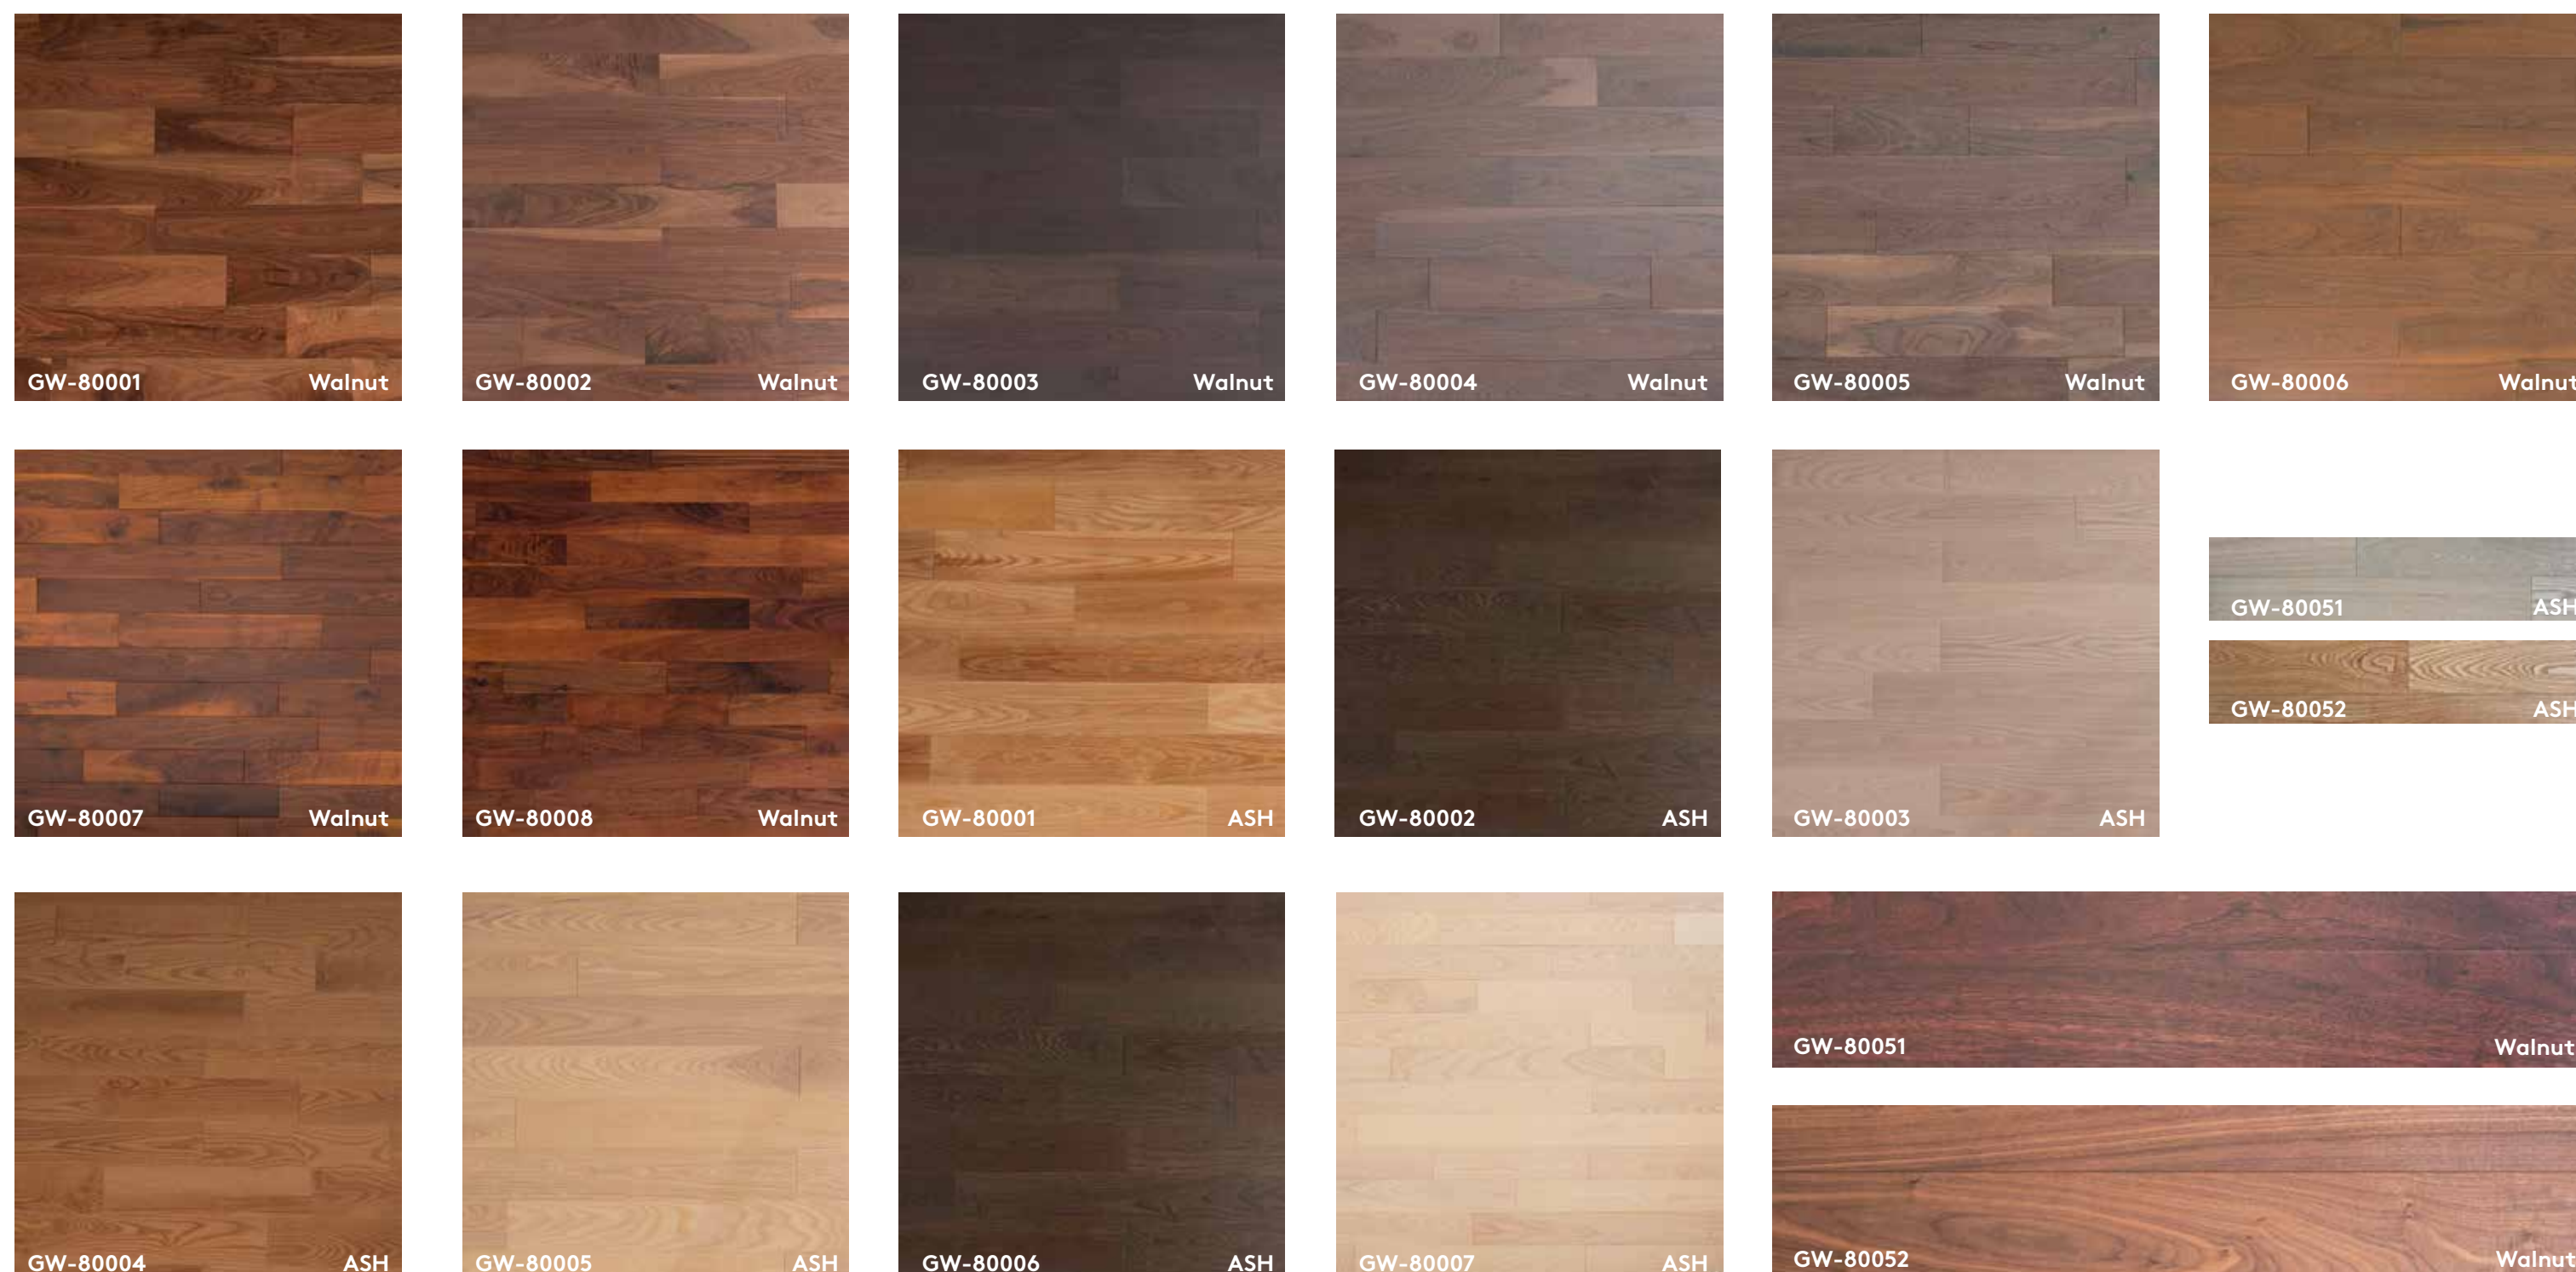

# American WALNUT WOOD

ASH

Grade **A** **B** **C**  
**D** **E**

The dark, rich chocolate colors of the hardwood and the lighter-colored sapwood combine to create a flooring surface that is both versatile and sumptuous. Tight grain can give black walnut floors a more uniform look, though boards with curly or wavy can be found as well, as walnut often produces a wider variety of grain patterns. Easily stained to a wide variety of colors, black walnut flooring creates a stunning look that transforms any residential or commercial interior.

# Burmese Teak

---

Looking up at green teak tree in  
Teak Rain forest.

# Burmese TEAK WOOD

Through hundreds of years and from generation to generation, teak has been the recognized wood species for exclusive land-based applications. Rightly so, as its unsurpassed characteristics, behaviour, golden colour, stability & durability are simply unmatched by any other tropical hardwood species.

# Surface Treatment.

For long-lasting pleasure

- 1. Brush**
- 2. Handcraft**
- 3. Smoke & Fume**
- 4. Carbonize**
- 5. Chemical Reaction**
- 6. Lacquer**
- 7. Oil**
- 8. Raw (Unfinished)**

\* The floors are given a multi-component lacquer finish, which makes the floor elastic and increases its scratch resistance.

\* The deep impregnation repeated on the naturally oiled floors several times emphasises the natural wood grain and protects the wood from the inside.

# Adhesive Coating.

American Franklin Phenolic -  
Hardener 200 adhesive.

Germany Treffert **AL2O3** -  
scratch-resistant UV lacquer coating.
